PROFESSIONAL SUMMARY

Customer Success and account management professional with seven years owning books of business across payments and fintech. One of four people who built EBANX's first Customer Success function from zero, personally owning its first NPS program and churn monitoring while managing a portfolio of 300 international merchants, including an enterprise account processing roughly \$300M annually. Four years co-founding a cross border payments platform, owning customer and institutional partner relationships end to end across onboarding, compliance, and delivery with 18 financial institution partners. Fluent Portuguese and French. MS Technology Commercialization, UT Austin.

SKILLS

Customer Success: Portfolio and Account Ownership | Retention and Expansion | Lifecycle Playbook Design, Onboarding, and Account Handover | NPS Program | Churn Monitoring and Risk Mitigation | Account Health Monitoring | Executive and Cross-Functional Stakeholder Management | Data-Driven KPI Reporting and Dashboards

Tools: SQL | Tableau | DBeaver | JetAdmin | CRM (Salesforce, HubSpot) | Claude | Figma | Webflow | Excel | REST API

EXPERIENCE

COO AND COFOUNDER 04/2021 to 03/2025

Betaramps, United Kingdom

- Owned customer and partner success end to end across a book of 18 institutional partners and merchant accounts, including Circle and Bitso for stablecoin settlement and FX, and Yellow Card and AZA Finance for Sub-Saharan African corridors; aligned internal AML, CFT, privacy, and merchant agreement policies to partner onboarding requirements to keep every relationship compliant and retained.
- Built and scaled cross-border payout relationships covering bank transfer, mobile money, and stablecoin settlement across 31 countries, with Mexico and Brazil as core markets and live corridors in the US, Argentina, Senegal, Kenya, France, Norway, and Denmark; cut processing costs by 40% end-to-end and drove a 4x MoM increase in TPV.
- Monitored partner and corridor health by querying transaction data in DBeaver and building KPI dashboards in JetAdmin, intervening early on degrading performance by reallocating volume toward higher-performing partners to protect service levels and retention.
- Delivered segregated customer custody ahead of Central Bank of Brazil enforcement of the VASP framework, protecting continuity of service for customers in the platform's largest market, and designed the AML decisioning workflow end-to-end. Automated 95% of previously manual transactions.

SALES MANAGER 12/2020 to 05/2021

Cellulant, Kenya

- Ran technical and commercial feasibility on a \$100M payment service provider (PSP) opportunity and advised against onboarding when FX pricing and settlement transparency could not be made viable in the Nigerian market, protecting 3+ months of engineering bandwidth.
- Translated enterprise merchant requirements into structured product feedback on pricing transparency and local payment method coverage, and proposed USDT/NGN liquidity structures to mitigate currency risk.
- Sold e-commerce payment solutions into Sub-Saharan African markets where mobile money is the dominant rail, positioning card and bank collection alongside M-Pesa, MTN MoMo, and Orange Money coverage.

SENIOR ACCOUNT MANAGER AND CUSTOMER SUCCESS 06/2018 to 03/2019

EBANX, Brazil

- Owned payment performance and account health for a portfolio of 300 international merchants processing in Brazil and Mexico, including a fast fashion e-commerce account that grew to roughly \$300M in annual TPV, monitoring chargeback, fraud, and refund exposure against the 1% threshold to protect the relationship.
- Part of the four person team that established EBANX's first Customer Success function, co-authoring the initial playbook covering lifecycle touchpoints, success criteria, and account handover; personally owned the first Net Promoter Score program and ongoing churn monitoring, and drove revenue retention through direct merchant engagement and lifecycle email campaigns.

- Architected a cross-border expansion workflow in HubSpot and Tableau using API triggers to automate country activation, giving existing merchants faster access to new Latin American markets; lifted quarterly merchant expansion count by 18% and reduced manual support tickets by 67% in one quarter.
- Improved merchant outcomes by analyzing decline reasons at BIN and acquirer level and partnering with Product to reroute traffic without engineering rework, and reduced dispute driven chargebacks by persuading merchants to open refund paths inside their own support flows.

BUSINESS DEVELOPER 12/2016 to 06/2018

EBANX, Brazil

- Led the integration of installment payments across Latin America, driving customer adoption, including a 126% MoM increase in average order value in Mexico.
- Originated and closed a global e-commerce merchant entering Latin America; owned the Mexico launch end-to-end across qualification, commercial negotiation, compliance, integration, and go-live.
- Acquired 80+ international merchants across inbound, outbound, and referral channels, using Salesforce to manage pipeline, log call activity, and track engagement, generating over \$30M in new processing volume within 18 months.

PROJECTS

- Autonomous Docket Monitoring Agent, 2026. Built and deployed a Python agent on a Linux VPS that scrapes a public legal docket with Playwright, diffs hashed state to detect new filings, and calls the Anthropic API to produce a plain English explanation of each change, delivered by email. Runs hourly on cron with file locking to prevent duplicate alerts.
- Venture Launch Plan, MSTC 2026. Won a judged launch plan competition with a plan covering business model and value delivery canvases, timeline and cost estimation, a risk register with mitigations, supplier selection, hiring plan, and a monthly pro forma through launch plus 36 months.
